Summary Statement

Experienced Full-Stack Java Developer adept at utilizing Spring Boot, Angular, and MySQL to deliver robust backend and user-friendly frontend solutions. Committed to driving company growth and continuously expanding skills through ongoing learning and development. Passionate about leveraging expertise to contribute to the success of the organization.

Work Experience

Software Engineer, Full Stack Web Developer | UST Global, Bangalore.

October 2022 – Present

- I have completed comprehensive training as a Full Stack Java Developer through a course provided by GAMA (Learning & Development) at UST Global.
- Proficient in developing full-stack web applications using Angular, HTML, CSS, and Java 8.
- Understanding the requirements and completing the task within the time.
- I have good knowledge of API manual testing using Postman.
- Good knowledge of Object-Oriented Programming (OOP) concepts.
- I have hands-on experience in developing and consuming RESTful APIs.
- With my experience of working collaboratively in team environments, I can efficiently collaborate with my team members to achieve project goals.
- I have completed comprehensive training as SAP ABAP Developer through a course provided by GAMA at UST Global.
- Designed and developed custom reports using ABAP programming, resulting in increased efficiency and time savings.
- Developed and maintained Adobe forms, resulting in improved user experience and system performance.

Internal Projects:

Data Table

- Develop interactive method for managing and displaying data in tables.
- Leverage Angular and Angular Material for Data Table project.
- Create data-rich tables for visually appealing presentation.
- Implement interactivity, sorting, and filtering features.
- Ensure seamless data manipulation.
- Develop using HTML, CSS, and TypeScript.
- Result in a user-friendly web application.

Sports Event Management System

- Created a sports management system using Spring Boot for API development.
- Implemented CRUD operations for player registration, event scheduling, and sports management.
- Utilized MySQL for backend operations and Angular for frontend development.
- Designed a user-friendly web interface with HTML, CSS, and Typescript.
- Collaborated with the team throughout the project, addressing errors and ensuring seamless functionality.
- Included product management features for easy addition, update, listing, and deletion of products.

Technical Skills

Front-end Technologies: HTML5, JavaScript, Angular

Back-end Technologies: Java, Databases, Spring boot.

Database Management: MySQL. Version Control: Git, GitHub.

API Development: RESTful.

Programming Languages: Java

Other Tools: Visual Studio Code, Eclipse

SAP (ABAP) : Function Module, Reports, OOPS ABAP

Education

Master of Computer Applications

JSS Science and Technology University, Mysuru, Karnataka
